Fumai Amino acid sequence of a human growth hormone (hGH). 25-SEP-2000 (first entry)

hlman; growth hormone, hdH; inhibitor; nucler factor-kappaB; NF-kappaB; mmltt-drug resistence gone; malignant hemopath; solid cunour; mmlignant blood disease; leukasmis; lymphoma; solid cancer.

Homo sapiens.

WO200030587-A2.

02-JUN-2000.

25-NOV-1998; 98FR-00014858. 24-NOV-1999; 99WO-FR002897.

(CNRS) CENT MAT RECH SCI.

Hirsch F, Haeffner A,

WPI; 2000-399901/34. N-PSDB; AAA46696.

Treatment of hematological or solid tumore using an inhibitor of the activation of nuclear factor-kapas particularly to prevent development of resistance to chemotherapeutics.

determined, most and along disorders; disponding of dystingigins and cutation of the second of the s	ndromes, mood and sleep disorders; diagnosing GH dysfunction and	eful in gene therapy or protein therapy. The GH1 or GH variants are especially	used in the preparation of a medicament, diagnostics composition or	t, or detection kit. The method has the advantage of evanding the	ow spectrum of GH1 gene mutations; evaluating the role of GH1 gene	tations in the etiology of short stature; identifying of the mode of	nerilance of novel lesions; evaluation the effects of GHI mutations on	e structure and function of the GH molecule and days on the GH molecule	agnostic tests for inherital or desided and development of rapid	human growth hormone 1 (out) This sequence is a variant	numan growth hormone 1 (GH1), created from the GH1 wild type sequence	SCHEEN IN Figure 6 and one of many variations of the gene	scussed in the method of the invention	217	Scores:	5.28e-89 Length:	1029.50 Matches:	93.09# Congervative.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         82
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  22222

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           12-MAR-2002 The invention described a method of descring variation is growth hormon careful, and hearefore all dysfunction in an individual, the method couldn't, and hearefore all dysfunction in an individual, the method care the care smaple with its than and section sequence of did gene obtained from the care smaple with its than and section and the control of the country. The method is gene expenses, in order to identify growth hormone irregularities or producing variant processes for trueing growth hormone irregularities or producing variant processes for trueing.	Claim 18; Page; 95pp; English.	Detecting growth homene watenie (GN1), useful in streening patients for growth homene frregularities, comprises comparing the deservation of a GRI gene from a test sample with that of a standard sequence of the Mannan GRI.
